

Advanced Web Application Vulnerability Scanner Report

Executive Summary

Target	https://youtube.com
Status	completed
Risk Score	255
Risk Level	Critical
Total Assets	50
Total Findings	109

Vulnerability Findings

1. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

2. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

3. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: https://youtube.com/t/contact_us/

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

4. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/contact_us/

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

5. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/t/terms>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

6. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/terms>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

7. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/privacy>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

8. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/t/privacy>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

9. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

10. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/new>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

11. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/yt/about>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

12. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/yt/about>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

13. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/yt/about>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

14. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: https://youtube.com/t/community_guidelines

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

15. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: https://youtube.com/t/community_guidelines

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

16. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/community_guidelines

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

17. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/yt/jobs>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

18. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/yt/jobs>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

19. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/yt/jobs>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to

other sites via the Referer header.

20. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/press>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

21. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/t/press>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

22. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/press>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

23. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: https://youtube.com/t/advertising_overview

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

24. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: https://youtube.com/t/advertising_overview

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

25. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/advertising_overview

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

26. Missing Content-Security-Policy header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/contentid>

Evidence: Response headers did not include 'Content-Security-Policy'

Recommendation: Set a Content-Security-Policy header to restrict which sources scripts, styles, and other resources can be loaded from, reducing the impact of XSS if it occurs.

27. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/contentid>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

28. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/yt/dev>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

29. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/yt/dev>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

30. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: https://youtube.com/t/terms_paidservice

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

31. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/terms_paidservice

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

32. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: https://youtube.com/t/usage_paycontent

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

33. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/usage_paycontent

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

34. Missing Content-Security-Policy header

Module: headers

Severity: medium

Endpoint: https://youtube.com/t/policy_cns

Evidence: Response headers did not include 'Content-Security-Policy'

Recommendation: Set a Content-Security-Policy header to restrict which sources scripts, styles, and other resources can be loaded from, reducing the impact of XSS if it occurs.

35. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/policy_cns

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

36. Missing Content-Security-Policy header

Module: headers

Severity: medium

Endpoint: https://youtube.com/t/copyright_notice

Evidence: Response headers did not include 'Content-Security-Policy'

Recommendation: Set a Content-Security-Policy header to restrict which sources scripts, styles, and other resources can be loaded from, reducing the impact of XSS if it occurs.

37. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/copyright_notice

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

38. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/privacy?hl=en-GB>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

39. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/t/privacy?hl=en-GB>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

40. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to

other sites via the Referer header.

41. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/t/terms?hl=en-GB>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

42. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/terms?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

43. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

44. Missing Content-Security-Policy header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/faq?hl=en-GB>

Evidence: Response headers did not include 'Content-Security-Policy'

Recommendation: Set a Content-Security-Policy header to restrict which sources scripts, styles, and other resources can be loaded from, reducing the impact of XSS if it occurs.

45. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/t/faq?hl=en-GB>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

46. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/faq?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

47. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy/frameworks?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

48. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy/key-terms?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

49. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy/google-partners?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

50. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/privacy/archive?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

51. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/location-data?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

52. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/product-privacy?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

53. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/partner-sites?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

54. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: https://youtube.com/t/technologies/partner-sites?hl=en-GB&hl=en_GB

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

55. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/ads?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

56. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/retention?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

57. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/t/technologies/cookies?hl=en-GB>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

58. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

59. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

60. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

61. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/ai/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over

HTTPS, preventing downgrade/SSL-stripping attacks.

62. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/ai/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

63. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/ai/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

64. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/copyright/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

65. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/copyright/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

66. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/copyright/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

67. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/creator-economy/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

68. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/creator-economy/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

69. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/creator-economy/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

70. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/elections/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

71. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/elections/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

72. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/elections/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

73. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/kids-and-teens/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

74. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/kids-and-teens/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

75. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/kids-and-teens/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

76. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/learning/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

77. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/learning/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

78. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/learning/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

79. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/news/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

80. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/news/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

81. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/news/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

82. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/privacy/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over

HTTPS, preventing downgrade/SSL-stripping attacks.

83. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/privacy/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

84. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/privacy/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

85. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/recommendations/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

86. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/recommendations/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

87. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/recommendations/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

88. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/our-policies/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

89. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/our-policies/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

90. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/our-policies/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

91. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/howyoutubeworks/youtubes-impact/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

92. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/howyoutubeworks/youtubes-impact/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

93. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/howyoutubeworks/youtubes-impact/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

94. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/jobs/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

95. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/jobs/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

96. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/jobs/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

97. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/jobs/engineering/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

98. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/jobs/engineering/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

99. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/jobs/engineering/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

100. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/jobs/product-and-design/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

101. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/jobs/product-and-design/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

102. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/jobs/product-and-design/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

103. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/jobs/business-and-operations/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over

HTTPS, preventing downgrade/SSL-stripping attacks.

104. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/jobs/business-and-operations/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

105. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/jobs/business-and-operations/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

106. Missing Strict-Transport-Security header

Module: headers

Severity: medium

Endpoint: <https://youtube.com/jobs/trust-and-safety/>

Evidence: Response headers did not include 'Strict-Transport-Security'

Recommendation: Set Strict-Transport-Security (HSTS) to force browsers to only connect over HTTPS, preventing downgrade/SSL-stripping attacks.

107. Missing X-Frame-Options header

Module: headers

Severity: low

Endpoint: <https://youtube.com/jobs/trust-and-safety/>

Evidence: Response headers did not include 'X-Frame-Options'

Recommendation: Set X-Frame-Options (e.g. DENY or SAMEORIGIN) to prevent the site from being embedded in a malicious iframe (clickjacking).

108. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/jobs/trust-and-safety/>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.

109. Missing Referrer-Policy header

Module: headers

Severity: info

Endpoint: <https://youtube.com/?tab=uu>

Evidence: Response headers did not include 'Referrer-Policy'

Recommendation: Set a Referrer-Policy header to control how much URL information is leaked to other sites via the Referer header.
